

Use this template to create your flooring design based on patterns from our website OR create your own!
Each Flexi-Flor® tile is 12" X 12". Each square on this template represents one square foot.

Fax or mail your completed template to us. Within 48 hours of receipt we'll give you an estimate along with the approximate number of tiles needed of each color and the amount of adhesive we recommend.

Assign a number to each color you are using. When indicating a color to be used in a large area you may mark the number once and add arrows and notes to indicate the area of coverage.
